

CreaseMaster Plus Pneumatic Creaser

The CreaseMaster Plus is ideal for the mid to high volume users ensuring a professional finish for every job. This pneumatic model is available in two production speeds; 3600 sph or 4600 sph and both offer multiple creases per sheet, job memory as well as optional strike perf. The system incorporates a user-friendly touch screen allowing for easy operation.

- Impact creasing significantly reduces cracking of digitally-printed substrates during the finishing process
- Inverted AND regular impact creasing in the same pass
- Up to 10 impact creases per sheet
- Up to 20 jobs can be stored into memory
- Rotary perforations (at the entrance of the machine for accuracy; no tail whip) are anvil style and produce a "burr-free" finish. Microperfs are also available
- NOTE: machines are pneumatic and require compressed air (compressor; not supplied) to operate

CreaseMaster Plus

AutoCreaser Precision Channel Scorer

The AutoCreaser provides a fast, effective way to channel score covers, cards or laminated material virtually eliminating image cracking. This capability is especially important in digital color and print-on-demand environments. Simple operation, high productivity and economical cost make the AutoCreaser an excellent complement to your finishing operation.

AutoCreaser

- Fully Automatic
- Simple Programming
- Accurate Registration
- Up to 16 scores per sheet
- Up to 5,000 single scores per hour (8 1/2"x 11" Sheet Size)
- Up to 3,360 double scores per hour
- Bottom suction feed
- 230V, 60Hz, single phase 15A

CreaseMaster Pro Impact Creasing Machine

The CreaseMaster Pro is a floor model, impact creasing machine for low to mid-volume users. It is available in either a hand fed or a friction fed model and both are easily upgradeable if volume warrants it. Invert and Regular scoring in the same pass enables you to quickly create Z folded pieces.

- Impact creasing significantly reduces cracking of digitally-printed substrates during the finishing process
- Floor model impact creasing machine for low to mid volume users
- Pneumatic model (requires compressed air)
- Stream fed by hand at speeds up to 2000 sheets per hour
- Menu driven touch screen controls allow for unequalled ease of use
- Up to 5 scores per sheet
- Up to 2000 sheets per hour

CreaseMaster Pro

EasyCrease Pro Semiautomatic

The EasyCrease Pro™ offers superior channel-creasing capability across a broad range of paper stocks. Its convenient semi-automatic operation and desktop design create an ideal creasing solution for printed stocks that require a clean sharp fold. The exceptional quality and unique benefits of channel-creasing over traditional rotary scoring delivers clear performance advantages in preventing damage and cracking along a folded edge of paper stock.

- Semi-automatic operation
- Ideal for glossy and digital prints
- Single sheet 3 seconds/crease
- Electric foot pedal operation
- 14.5" maximum sheet width

DocuCrease Channel Scorer

Achieving crack-free scoring of stocks printed from digital color and black and white printing systems is no longer an issue with the DocuCrease. Easy to use, the economical DocuCrease is ideal for any environment looking for a shortrun creasing solution to compliment its digital printing systems.

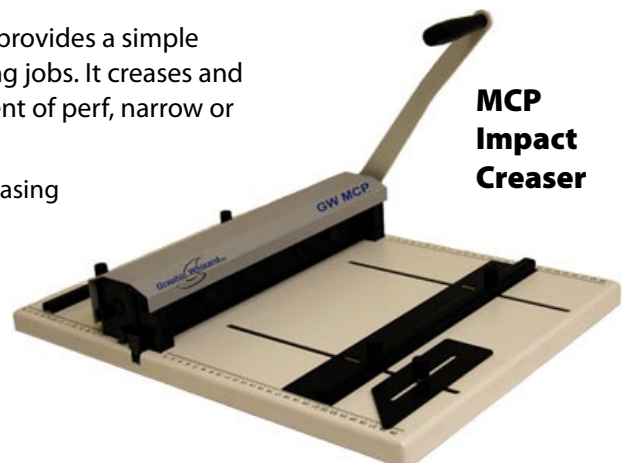

- Simple innovative design
- Ideal for glossy covers & digital prints
- Two models for scores up to 20.5"
- Manual lever press
- Model DC 35 takes up to a 14" sheet
- Model DC 52 takes up to a 20.5" sheet

MCP Tabletop Impact Creaser

The MCP is a tabletop impact creasing and perforating machine that provides a simple economical solution for low volume or occasional creasing/perforating jobs. It creases and perforates on any angle up to 90° with a simple manual adjustment of perf, narrow or wide crease.

- A simple economical solution for low volume occasional creasing
- Offers the same multi-position creasing advantage as the CreaseMaster
- Two handles allow the operator to choose a regular or inverted crease
- Up to 2000 sheets per hour

MBM AEROCUT

MBM Air Feed Slitter / Cutter / Creaser

This versatile performer slits, cuts, creases and perforates a wide variety of jobs, including brochures, business cards, post cards, greeting cards, CD jackets, etc. with laser-sharp accuracy.

It is ideally suited for digital applications and is compatible with a wide range of stocks including gloss, laminated, and UV coated. Most stock can be creased without cracking, even with full-bleed ink coverage.

The Aerocut features a digital touch screen control panel for quick and easy set-up features addition and preset cutting modes. Ships with 96 pre-programmed cutting templates; with the capacity for up to 50 additional custom programs to be stored in memory.

Features

- Self-correcting cut mark registration function and variable pressure feed rollers ensure accurate cuts every time
- Air-suction feed system and air knife eliminate marking and double feeds
- 5-position crease depth adjustment dial
- Standard on-line perforating unit
- Magnetic paper guides are easily adjustable for various stock sizes
- Handy business card collection tray snaps into place for neat stacking of finished cards
- Self-sharpening blades
- All-metal construction
- Mounted on lockable, heavy-duty casters
- Safety access cover—machine will not operate with cover in open position

Specifications

Speed	12 sheets/min.*
Sheet capacity	2-1/4" (stack)
Paper size	8-1/4" x 8-1/4" to 14-3/8" x unlimited
Paper weight	80 to 130#.
Power supply	115 V, 60 Hz
