

The McIntire Service Advantage

The McIntire Service Team protects more than just your equipment. We also look after your company's productivity, performance, and profits. By combining our manufacturing expertise, factory-trained service professionals and area coverage, we're able to provide you with the perfect solution: one that's matched exactly to your equipment needs and your business goals.

By investing in the McIntire Service Team solution, you'll always be protected from the adverse effects of unexpected downtime. Each Equipment Maintenance Agreement (EMA) starts by covering all parts, labor and travel expenses associated with costly repairs.

Without protection, the cost to replace one key component could easily exceed one year of complete coverage.

McIntire Equipment Maintenance Agreement Benefits:

- **Unlimited Service Calls:** We service equipment correctly the first time. If we don't, it costs us, not you.
- **Defy Inflation:** One reasonable payment covers you for a year. Your budget is fixed no matter how parts, labor or gas prices may climb.
- **Decrease Downtime:** MBP service professionals employ factory-approved tools and techniques. Our experienced technician will come to your location and do the work on site, ensuring you receive complete service.
- **Parts Are On Us:** Replacing just one key component could easily cost more than the entire agreement. Once you are protected by the McIntire Equipment Maintenance Agreement there is no charge.
- **New-Operator Training:** Proper training is essential to increase quality and productivity and reduce waste.
- **Labor and Travel Time Are On Us:** No matter how far we travel or how much work we put in, you are covered.

Catena Series

Catena 35 • Catena 65 • Catena 105

Designed to encapsulate and mount prints from color printers and copiers, the Catena Series provides a simple way to finish your full-color digital output. These models feature heated rollers that can also run pressure-sensitive films for moderate laminating production.

Features

- LCD display indicates temperature, speed and Ready / Wait condition
- Silicone rubber rollers ensure timely clean-up
- Interlocking feed tray and magnetic safety shield provide safe operation
- Designed for thermal and pressure-sensitive films
- Roller gap adjustment handles mounting boards up to 3/16" thick
- Rewind roller peels away pressure-sensitive release liner
- The user-friendly control panel allows the operator to make adjustments easily as needed for professionally laminated graphics
- Infrared heating coil distributes heat evenly and improves lamination quality
- Microprocessor controls temperature and guarantees fast response time
- Will not interfere with electrical surroundings; no buzzing, humming or flickering lights

Catena 35

This compact laminator is designed to provide safe and convenient lamination in offices and small print shops producing 8.5" x 11" prints.

Catena 65 & 105

When productivity and profit count the most, the Catena 65 and 105 meet the requirements of your more demanding jobs. These larger units are able to handle a wider variety of applications including standard poster-sized prints.
