The Digibinder Perfect Binder

The Digibinder will bind books automatically with a touch of a button. The book thickness is self adjusting. Simply place the book in the clamp and the Digibinder will do the rest. It sets the clamp thickness automatically. The unique blade roughs the entire backbone of the book and also notches the spine. Twin glue rollers apply an even glue application and the nipper is adjusted automatically.

The few manual adjustments needed to be made are: Setting the glue temperature, the dwell time on the nipper and the book height for the nipper plate. The latter allows you to bind books with case bound covers on down to light cover stock.

Bind books for commercial distribution or merely for samples. Good for runs of one, one thousand or five thousand. The user friendliness of the Digibinder will astound you.

No jam ups, no set ups. One touch perfect binding is here!

Specifications:

Maximum Length	12.5" / 320mm
Maximum Thickness	2" / 50mm
Speed	Up to 360 Books Per Hour
Power	220 Volts, Single Phase
Warm Up Time	30 Minutes
